o The customer fills in a contact form and press quote/
o The Admin receive the quote in his mail.

Installation guide for Magento 1.5, 1.6 and 1.7:
Make a good backup before installation. Preferably perform a first installation in your test/development environment.

1. Upload the app map and design map with FTP to the Magento root. Use the current paths.
2. Go to system>index Management>Select all and reindex Data
3. Go to system>Cache Management>**flush magento cache** and **flush Cache storage**
